

# Future, The Percocet and Stripper Joint

I get mad zooted, I got this bad thing I recruited  
My passion is a movie, I say fuck it 'cause that's ruder  
I stay on Miley Cyrus, everyone I go I'm screwed up  
I know my Texas niggas got my back and that's for sure though  
Sipping on Easter Pink like it's tangarang lean  
Never gonna do this, fuck your life  
I know the boys saying they getting into the money over there  
Baby trust me, these niggas nothing like us  
I put charisma in my new girl when she fell for me  
I gave her realness, it's all she gonna get from me  
Bonafid  superstar I'm straight up out the hood, uh  
I just did a dose of percocet with some strippers

I just did a dose of percocet with some strippers  
I just poured this lean in my cup like it's liquor  
I just need a whole lot of drugs in my system  
I just tried acid for the first time, I feel good

Treasure bring misery, codeine in my delivery  
I pulled up in a big B, swerving like a hippy  
Moving with the dopers and pushers  
In the rover ducking undercover hugging the interstate  
Copping a couple cakes and the drum hanging under me  
Got a chain hanging over me, God watching over me  
All my angels watch over me, I bag it like groceries  
Keep this cash going over me  
Got some money all in my hand and I stack it all under me  
Young niggas under me they gon stand up and then do what?  
Who built this shit ground up? At the head of a seminar  
I talk for the real ones, I talk for them niggas  
They feel this shit out in Belgium  
Free band game

I just did a dose of percocet with some strippers  
I just poured this lean in my cup like it's liquor  
I just need a whole lot of drugs in my system  
I just tried acid for the first time, I feel good
