

# Gene Clark, For Me Again

The moon can light the sky at night for me again  
The sun can make the daytime bright and fun again  
And my heart can be free the way it wants to be  
Cause you come back to me again

The wind blows pain and clouds of rain away again  
And let&#039;s me stay with just a happy day again  
Cause now I really see how much you do love me  
How good the world can be again

Oh when you left that day  
I forgot how to care  
And I hid myself away  
But now since you are here

Winter days will seem like spring to me again  
With all the love that you will bring to me again  
And no matter what I&#039;ll do I will always see it through  
Cause I won&#039;t be without you again
