

Grace VanderWaal, Beautiful Thing

You think that you know my heart
And probably do
So I'm always with you
I could stay with you for hours
In an empty room
Never get bored
Never have nothing to do

You're my other half
You're what makes me, me
What makes me smile
When I fall down and can't get back, get back, get back up
On my feet
Without you here I am boring
Something inside you is triggering
And makes me myself makes me funny

You're a beautiful thing
We're a beautiful thing together
Even when the weather is low
You're a beautiful thing
We're a beautiful thing together
Even when the weather is low

We can find the rainbow
Up in the sky
You'd say don't you cry, it's all gonna be alright
If we ever got into a fight or war that would be bad
Cause you know my all of my secrets
But I know all yours

Make hours into seconds together
The weight of the world feel like a feather
Cause we're holding it right in our hands

You're my other half
What makes me, me
What makes me smile
When I fall down and can't get back get back get back up on my feet

Without you here I am boring
Something inside you is triggering
And makes me myself makes me funny

You're a beautiful thing
We're a beautiful thing together
Even when the weather is low

You and me together
We'll forget what we have been told
We'll live in our own dream world

You and me forever
We'll forget what we have been told
we will take on whole word
without you here I am boring
Something inside you is triggering
And makes me myself makes me funny

You're a beautiful thing
We're a beautiful thing together
Even when the weather is low
And that's a beautiful thing
