## Groove Coverage, End

My home is in motion, as darkness unfolds. The air overloaded, the sky's dancing gold. But you went away, you left me to stay We'll see us in heaven, I'm counting the days

At the end of time, at the end of us, At the end of everything we had, Only faith helps you, only grace can do Only you can take the pain Cause the end of peace is the end of life and the end of any happiness Only love helps you, only trust can do Only you can take the pain of me

When thunder is calling I feel so alive The very first morning, can you see the light? But you closed the door, to what I adored We'll see us in heaven, I'm counting no more

At the end of time, at the end of us, At the end of everything we had, Only faith helps you, only grace can do Only you can take the pain Cause the end of peace is the end of life and the end of any happiness Only love helps you, only trust can do Only you can take the pain of me
