

Guided By Voices, Burns Carpenter, Man Of Science

Burns Carpenter, Man of Science
discovers a new rich compound
a liquid form of love
a brain in psychic peril
This kind of love
will destroy the ozone
Tossed sharply in production
but unique opportunity presents itself
then this is the new school
the first day is always anxious

the first day is always
This kind of love
will destroy the ozone
Taken to the test
but regrettably not sold
for ultimately it must fail
untimely and perhaps not too bold
This kind of love
will destroy the ozone
