

Guided By Voices, Her Psychology Today

yeah you know things could get much worse
you know things could get much worse
could be better, yeah..

her psychology today is to play the crying game
to elicit a response to determine every gain
and i'm wanting to attain something in this turnabout

when she speaks the flag unfurls
and the heavens split in half
when she launches her attack
in her opening paragraph

and she is having the time of my life
she is having - she is

....?

hey you know things could get much better
could be better
hey you know things could get much better
could be better
gotta be better, you know..
