

# Guided By Voices, I Am A Scientist

i am a scientist - i seek to understand me  
all of my impurities and evils yet unknown  
i am a journalist - i write to you to show you  
i am an incurable  
and nothing else behaves like me

and i know what's right  
but i'm losing sight  
of the clues for which i search and choose  
to abuse  
to just unlock my mind  
yeah, and just unlock my mind

i am a pharmacist  
prescriptions i will fill you  
potions, pills and medicines  
to ease your painful lives  
i am a lost soul  
i shoot myself with rock & roll  
the hole i dig is bottomless  
but nothing else can set me free

and i know what's right  
but i'm losing sight  
of the clues for which i search and choose  
to abuse  
to just unlock my mind  
yeah, and just unlock my mind

i am a scientist - i seek to understand me  
i am an incurable and nothing else behaves like me

everything is right  
everything works out right  
everything fades from sight  
because that's alright with me
