

Joe, Another Used To

I brought you here
So that I could express the things
I've been thinking about
Give me your ear
'Cause I don't normally do this
So bare with me through this
There are so many things that I wanna say
But let me start by simply saying I thank you
Darling just because

HOOK 1

I used to love someone that I didn't like
We used to wanna break up every other night
I used to think relationships were a lot of stress
I used to think that pain was a part of happiness
Now all that changed since you've come my way
But I don't want us to become
Another used to be

I hope what I'm saying don't discourage you in any kind of way
'Cause I do believe
That you have a potential to be everyting I need
I hope that you can really understand
That I would hate to be with someone new
And tell her what I'm telling you

HOOK 2

I used to love someone that I didn't like
We used to wanna break up every other night
I used to think relationships were a lot of stress
I used to think that pain was a part of happiness
Now all that changed since you've come my way
Since you come my way
But I don't want us to become
Another used to be

'Cause it would only be a another waste of time
Another moment to erase out of my mind
Another memory a part of history
I can't forget it 'cause it keeps on haunting me
Now that you're here
It's evidently clear (I don't have to worry)
I don't ever have to have this worry again (again)

HOOK 1 REPEAT
