

Jonas Blue, We Could Go Back (ft. Moelogo)

Shoulda coulda woulda
but it's too late
shouldn't catch feelings on a first date
0 to 100
no first base
ended up with coffee back at your place

every night is keeping me awake
I keep thinking about all the things
I would change

if we could go back
tell me would you even
would you still believe in
and if we turn back
tell me would you even
would you still believe in me?

turn the wheel
but it's bio race
never had a time to find our own pace

trying to drive feelings that won't go away
sleep in the bed on my own mistakes

every night is keeping me awake
I keep thinking about all the things
I would change

if we could go back
tell me would you even
would you still believe in
and if we turn back
tell me would you even
would you still believe in me?

I know time waits for no man
I'm standing here now
with no plans
let's go baby
go, go, baby!

if we could go back
tell me would you even
would you still believe in
and if we turn back
if we could come back
tell me would you even
would you still believe in me?
tell me would you still believe in me?
tell me would you still believe?
