Kalwi & Remi, On Your Side

I've found you I saw your smile So bright The world was there The world was you

I want to tell you more
I got your eye in your ...
You was the sign for
Me and you
We've found the same we knew
Now you're main

We've in the dream through the night I never let you cry again We've in the dream Don't say goodbye You know, the time is on your side Time is on your side You should know Time is on your side We both know the Time is on your side
