Kaskade x Deadmau5, Beneath With Me (feat. Sl

Can't escape All the fire burning bright Water still is rising Throughout the long nights

Come on, take my hand And focus on the light down at the end Say words to comfort me We still have time for home, That's all we need Beneath with me /3x

Morning grace Enemies have come together Miles have gone silent In the arms of strangers

Come on, take my hand And focus on the light down at the end Say words to comfort me We still have time for home, That's all we need Beneath with me /3x
