

# Kesha, Rainbow

I used to live in the darkness  
dress in black  
act so heartless  
but now I see that colors are everything

got kaleidoscopes in my hairdo  
got back the stars in my veins too  
now I see the magic inside me

this kitty cat lost her mind  
been looking for a star-sent sign  
that I will be alright  
look to the skies

I've found a  
rainbow .!2x  
trust me, I know  
life is scary  
but just put those colors on, girl  
come and play along with me tonight

I'd forgot how to daydream  
so consume with the wrong things  
but in the dark  
I realized this life is short

and deep down, I'm still a child  
playful eyes  
wide and wild  
I can't lose hope  
what's left on my heart's still made of gold

and I know that I'm still fucked up  
but aren't we all, my love?  
darling, our scars make us who we are  
so when the winds are howling strong  
and you think you can't go on  
hold tight sweetheart

I've found a  
rainbow .!2x  
trust me, I know  
life is scary  
but just put those colors on, girl  
come and play along with me tonight
