King Crimson, People

people fly people flee people clam and say "it wasn't me" people fish people beef people arm to teeth yes, you've got people on the tube walking on the moon people at the bottom of the sea people in tombs people in igloos even a tribe of pygmies

people are the main spring turning the world around people, they're the main spring spinning this world upside down

people sun people toast people tire shile other people smoke people bowl people rock people pay to see two people box

watch me face me dress me baby me phone me wire me house me bug me fire me

people are the main spring spinning the world around people, they're the main spring turning this world inside out
