

# Krzysztof Kiljański, This Is Forever

There's a secret place where I can go, when I'm feeling all alone,  
where I could stay forever

A little place inside your heart, when my world fall apart,  
where we can dream together

When in doubt you kiss away my fears, and when you smile love appears  
I know this is forever, I know this is forever

When I hold you close in my arms at night, everything will be all right  
as long as we're together, as long as we're together

You are my shelter from the cold, in a world what's bought and sold  
I know this is forever, I know this is forever

When in doubt you kiss away my fears, and when you smile love appears  
I know this is forever, I know this is forever

You kiss away my fears, and when you smile love appears

I know this is forever, I know this is forever

And when you smile love appears

I know this is forever, I know this is forever
