

Kygo, Firestone (ft. Conrad)

I'm a flame
Shot of fire
I'm the dark in need of light
And we touch, you inspire
Will it change in me tonight
So take me up, take me higher
There's a world not far from here
We can die in desire
Or we can burn in love tonight

Our hearts are like, firestones
When they strike, we feel the love
Sparks of light, they ignite our bones
When they strike, we light up the world
Our hearts are like, firestones
When they strike, we feel the love
Sparks of light, they ignite our bones
When they strike, we light up the world
We light up the world

We light up the world
oooh oooh
World
oooh oooh
Firestone

I'm from X, you're from Y
With the strangers in the night
Here we are, come together
To the world we'll testify
Our hearts are like, firestones
When they strike, we feel the love
Sparks of light, they ignite our bones
When they strike, we light up the world
Our hearts are like, firestones
When they strike, feel the love
Sparks of light, they ignite our bones
When they strike, we light up the world

We light up the world
We light up the world
oooh oooh
World
oooh oooh
Firestone
