Lil Peep, Awful Things (ft. Lil Tracy)

bother me, tell me awful things you know I love it when you do that helps me get through this without you bother me, tell me awful things you know I love it when you do that helps me get through this without you

bother me tell me awful things you know I love it when you move that on me love it when you move that on me

you like attention
I find it obvious
she makes it obvious for me
she feels the tension
it's just the 2 of us
it's just the 2 of us tonight

burn me down till I'm nothing but memories I get it, girl /3x /2x

bother me, tell me awful things you know I love it when you do that helps me get through this without you

bother me tell me awful things you know I love it when you move that on me love it when you move that on me

don't you turn your back on me let your teardrops fall on me speeding away the city in the rear view heart racing whenever I'm near you goth boy jumping on stage carry me away carry me away burn me down 'til there's nothing left I will scream your name with my last breath take off your favorite dress lay your head on my chest diamonds, rubys and gems you can have all of them

bother me tell me awful things you know I love it when you move that on me love it when you move that on me
