

Lil Pump, I Don't Mind (feat. YoungBoy Never Broke Again)

I love bad bitches but they not my problem
I love bad bitches but I don't want they problems
I love bad bitches but I don't love they problems
I love bad bitches but I don't love they problems

I don't mind being all alone
I don't mind being all alone
I don't mind being all alone
I don't mind being all alone

She use me as a stepping stone
I don't mind being all alone
Skin and bones, she a skeleton
Can't have my time, no metronome
She need a stethoscope, so do it like a telescope
I don't wanna text, you can call me on my telephone
I am not a hater, I got love for everyone
I been in a bad mood, don't want talk to anyone

I don't mind being all alone
I don't mind being all alone
I don't mind being all alone
I don't mind being all alone

I love bad bitches but they not my problem
I love bad bitches but I don't want they problems
I love bad bitches but I don't love they problems
I love bad bitches but I don't love they problems

Lean, Percocets, in my bed, I'm missing your love (Oh, oh)
Cars, money, clothes, all these bitches and they problems with drugs, I allow for 'em (Oh, oh)
I was spending money, chasing you 'fore you just started to do anything
Go to war one more time behind your love, empty it all, I can never change
But I can't be dumb forever, I done moved on, took it up to another level
Got no problem with being alone, I've been staying strong, getting money the best way
And I don't mind finding a nicer woman just to love me
It's on top of my back, I just need to relax, should have knew for a fact that you wouldn't fuck me
I ain't gotta glow up, I was moving with racks on me, we just had to thug me
This could be our hood rich story and I don't mind

I don't mind being all alone
I don't mind being all alone
I don't mind being all alone
I don't mind being all alone

I love bad bitches but they not my problem
I love bad bitches but I don't want they problems
I love bad bitches but I don't love they problems
I love bad bitches but I don't love they problems
