

Little Dragon, High

I guess we'll never get started
Let's stay ... and soul, mate
No need to talking about it
Sometimes the quiet is so right

High over the North Star
Sleepless so far
Together we're high
Checked in a holiday of dream
A new silence fill the air

I rest my head on your shoulder
There's nowhere else I'd rather be
Right there, little bit slower
Feel free to roll another one for me

High over the North Star
Sleepless so far
Together we're high
Checked in a holiday of dream
A new silence fill the air

Look away this way
We slide
On fly to space to the Moon
It's told to be true
Half-moon
Look away we sway
We slide

High over the North Star
Sleepless so far
Together we're high
Checked in a holiday of dream
A new silence fill the air
