

# LuvBug, Revive (Say Something) ft. Mark Asari

Baby, you have set me free and now I am free  
What I want right now is someone I can call  
Someone that will take me far away from what I know  
Everything is clear whenever you are near  
The weight is off my shoulders, all my worries disappear

Oh baby, the moon and the stars  
Oh baby, tell us who we are  
Oh baby, giving me new live  
Baby you have set me free  
And now I am Revive  
Say something do something,  
Say something do something,  
Say something do something,  
Say something do something,  
Revive  
Bounce! Bounce, bounce!  
Revived, and now I am Revive  
And now I am Revive

All I need right now is a deeper love  
Someone I can rest my head when the times get tough  
Given every day, act in your embrace  
And I feel no pain and now I can survive the rain

Oh baby, the moon and the stars  
Oh baby, tell us who we are  
Oh baby, giving me new live  
Baby you have set me free  
And now I am Revive  
Say something do something,  
Say something do something,  
Say something do something,  
Say something do something,  
Revive  
Bounce! Bounce, bounce!  
Revived, and now I am revived  
And now I am Revive  
Baby you have set me free  
And now I am Revive  
Say something do something,  
Say something do something,  
Baby you have set me free  
And now I am Revive  
Say something do something,  
Say something do something,  
Baby you have set me free  
And now I am Revive  
Say something do something,  
Say something do something
