

MØ, Spaceman

Spaceman

I always wanted you to go
Into space, man (Intergalactic Christ)

I see the future with my third eye
Rising clouds in the dessert night
I'm a believer
I'm a believer
Give me a kiss of your lucid dreams
And I'm gonna whisper a melody
And we'll be glowing
Yeah, we'll be glowing

Lift off taking flight (Tell where, tell me where you wanna go)
Through the northern lights, oh, no
Burning satelights (Tell where, tell me where you wanna go)
Burning side by side, oh, no

Spaceman

I always wanted you to go
Into space, man (Intergalactic Christ)
Spaceman
I always wanted you to go
Into space, man (Intergalactic Christ)

What do you do in a world of blue?
Look to the sky for a brighter view
I'm a believer
I'll never leave ya
Let's make a home in the stars up high
Give me your love of the fourth kind
And we'll be glowing
Yeah, we'll be glowing

Lift off taking flight (Tell me where, tell me where you wanna go)
Through the northern lights, oh, no

Spaceman

I always wanted you to go
Into space, man (Intergalactic Christ)
Spaceman
I always wanted you to go
Into space, man (Intergalactic Christ)
Spaceman, spaceman
Spaceman, spaceman (I always wanted you to go)
Into space, man (Intergalactic Christ)

You make it real, you make it real
Take me away to your star, I
Want to believe, want to believe
Running with you in the night sky

Lift off taking flight (Tell me where, tell me where you wanna go)
Through the northern lights, oh, no

Spaceman

I always wanted you to go
Into space, man (Intergalactic Christ)
(Tell me where, tell me where you wanna go)
Spaceman
I always wanted you to go
Into space, man (Intergalactic Christ)
(Tell me where, tell me where you wanna go)
Spaceman, spaceman

Spaceman, spaceman (I always wanted you to go)
Into space, man (Intergalactic Christ)
