

# Mobb Deep, When U Hear The

Alchemist - fuck is the deal nigga?

Uh-huh, yeah..

Yeah.. when you hear the..

Yeah..

(Prodigy)

P yeah you heard of him, big ignorant chains and sports cars

Gallons of Bacardi, been at the awards

I need a bitch like Christina Aguilera for a broad

I know I can splack that, she dyin for a thug

And she heard of me, she know about my Infamous life

Shootouts in New York with various types

Fast money, faster guns, we party e'ry night

Cause we perform, e'ry day of the week for that price

(Mobb Deep) Who you know got a similar catalogue

and still sound brand new, like we just started?

The Carhatt Mobb, Guess jean team

Forty inch chain gang, volume please

So these people can hear the sounds of Queens

I make your arm hairs stand up, it had to be me

Mixed with the A-L-C and H-A-V

N.Y.C. to L.A., we do our swing

E'rybody have a ball, e'rybody party

E'rywhere you turn it ain't nuttin but phatties and hotties

E'rything is all love 'til you try to try me

That's when I make e'rybody (shhhh)

(Chorus)

When you hear the... it's on

When you hear the... it's on

When you hear that.. it's on

When you hear that.. it's on

(Havoc)

Yo I'ma glow, like a dirty bomb, jux, with the certy arm

Rippin anything, that you motherfuckin hear me on

Add it to the catalogue, heavy hitters had the song

Niggaz showin no feelings and me, got 'em camouflaged

(F'real baby) You little babies so emotional

And tip-toe around the beef until that toast to you

Ain't got no problem in smokin you

Enemies I could deal with, be the ones that's close to you

And do, what I'm 'posed to do, approach Duke

Why you faggots only squeezin from out, the vocal booth?

Know my style be that overproof, open the Coupe

Open your face was talkin, wasn't talkin to you

And now the medics gotta mind to your face, tyin the lace

You tellin that a D.A. got 'em tryin the case, yeah

Bottom line you cowards is ass

Know Mobb good, in numbers y'all music is trash

(gunfire) When you hear the..

(Chorus - echoes to fade)
