

# MU330, I Could Wait

I could wait some I could wait and you could get your  
Head together we all could wait some, we could wait  
And watch you crawl out of the gutter, tongue tied  
Last night more lies and another fight you could taste some  
You could take a taste and kill another bottle, you could taste  
Some you could take a taste and we could watch you plummet  
Right back to the bottom, you took my bait  
Now you'll have to wait
