

# Muse, Big Freeze

Healed (healed)  
Or are you still just reeling?  
Are you fine (fine)?  
Have you found a way to escape?  
Are you here (here)?  
Just because I need you  
Can we hold up?  
A big freeze is heading our way!

We are hiding to nowhere  
We still hope (hope)  
But our dreams are not the same, no!  
And I... I lost before I started  
I'm collapsing in stellar clouds of gas

Heal me  
What words just can't convey?  
Feel me  
Don't let the sun in your heart decay!

Fight (fight)  
Or will you show me mercy (mercy)?  
We expelled (expelled)  
The goodness from our hearts (hearts)  
Are you here (here)  
Just to prove your willing?  
Can you hold up  
And ride out this electrical storm?

We destroyed something beautiful  
We have faith (faith)  
But our truths are not the same, no...  
Don't give up (up)!  
Don't let the magic leave us (leave us)  
Stop the loneliest force becoming King Of The Universe

Heal me  
What words just can't convey?  
Feel me  
Don't let the sun in your heart decay

Don't give up  
Don't let the magic leave us  
We're collapsing in stellar clouds of gas

Heal me  
What words just can't convey  
Feel me  
Don't let the sun in our hearts decay
