Muse, Hypermusic

Your golden lies feed my role In this forgotten space race under my control Who's returned from the dead? Who remains?

You know I don't want you and I never did I don't want you and I never will

You wanted more than I was worth And you think I was scared And you needed proof Who really cares anymore? Who restrains?

You know I don't love you and I never did I don't want you and I never will
