Nazareth, Light My Way

Locked in a shadow Praying for release You found my prison Your love was the key So come on, light myday And come on, light my way.

Lonely's just a word now Something from my past Horizon's look brighter Loving you will last So come on, light my day And come on, light my way.

The world's now my oyster
Had me marked "reject"
You changed the story
Gave me back respect
So come on, light my day
And come on, light my way.
