

# Nazareth, Star

Walking alone at night in the cold rain  
Wondering if I will see you again  
In some corner light  
Running down the road in the warm sun  
Dreaming that I am still the one  
Resting by your side

Chorus:

You took the road to fortune and fame  
Your name in lights  
I want you to know I still feel the same  
star  
I still love you

Remembering when you played me that first song  
The first show that you asked me along  
Just to be around  
Working so hard 'till you got that first break  
You said you could turn them around  
Give them something new

(Chorus:)

Got that photograph of you and me  
I hear your voice on the tradio  
Will I ever lay with you again

Nobody planned it, we just seem to drift now  
I always seem to have to leave  
Just as you come around  
But someday soon girl I just got to see you  
I just gotta find out  
If we still have time

(Chorus:)
