## Neil Young, Way

The way, we know the way. We've seen the way

We'll show the way

To getcha back home

To the peace where you belong

If you're lost and think you can't be found

We know the way, we've got the way

We'll lead the way

To getcha back home

To the peace where you belong

The way, we know the way. We've got the way

We'll share the way

To bring you back home

To the peace where you belong

So many lost highways

That used to lead home

But now they seem used up and gone

They sure had the magic

When they were first found

But not this road

This road has never been closed

It's still brand new

The way, we know the way. We've seen the way

We'll show the way

To bring you back home

To the peace where you belong

If you're lost and think you can't be found

We know the way. We've got the way

We'll lead the way

To getcha back home

To the peace where you belong

Where you belong, where you belong, where you belong

We know the way

To getcha back home

To the peace where you belong

When faceless and anonymous

Come to beat down your door

And say you're all washed up and done

You can just say they have nothing in store

To touch this soul

Because they just don't know

They just don't know

The way

The way, we know the way. We've seen the way

We'll show the way

To getcha back home

To the peace where you belong

The way, we got the way, we know the way

We'll lead the way

To getcha back home

To the peace where you belong

If you're lost and think you can't be found

We know the way. We've found the way

We'll share the way

To getcha back home

To the peace where you belong

The way, we know the way. We've seen the way

We'll show the way
