

Norma Jean Martine, I Want You To Want Me (pi

We could stop it now
Before it starts
I still got bruises
I don't need more scars
It's been the while since I dance in the dark
When glad me new
And make of art
Can we just stay for while?
We just stay
Stay

I don't want to let down
I call you again
Be more then love
I need a friend
If I speak it loud it's be the truth
I want you To Want Me
The way I want you
I want you To Want Me
The way I want you
I want you To Want Me
The way I want you

I want to feel you deep in my skin
Don't knock down I will let you in
When we turn the eyes leave all behind

..
That would be the worst goodbye
You want me stay for a while
Can we just stay?
Stay

I don't want to let down
I call you again
Be more then love
I need a friend
If I speak it loud it's be the truth
I want you To Want Me
The way I want you
I want you To Want Me
The way I want you
I want you To Want Me
The way I want you

Don't leave it up till it starts
They don't know who we are
Don't leave it up till it starts
They don't know who we are

I want you
I want you

I don't want to let down
I call you again
Be more then love
I need a friend
If I speak it loud it's be the truth
I want you To Want Me
The way I want you
I want you To Want Me
The way I want you
I want you To Want Me
The way I want you
