

# Nuno Bettencourt, Pilots

I know you but you, you don't know me  
Won't you climb aboard and I'll  
Take you on a little ride  
I'm your pilot and I'm your captain  
Listen ground control could you  
Take us out the speed of sound

Hey follow me I've got the key  
Won't you come up and visit me  
We can get high on duty free  
Auto pilot self engage  
Let me check on my E.T.A.  
See how much time we've got to  
Play around  
Jet stream in full effect  
This is my cockpit discothque  
All V.I.P.s move to the back

Red eye girls you are the best  
Let me dim the lights my stewardess  
I think we're gonna feel some turbulence  
Relax  
Seat back feet up rest your head  
Watch the controls between your legs  
One wrong turn we'll all be dead  
I know  
You might think this isn't right  
Trust me I'm a captain of the skies  
Fasten seatbelts close your eyes

As we fade away  
Fade away
