

# Overkill, Bitter Pill

I'm a cold dark night on the summer  
I'm a block to seas, I won't go away  
Move baby, move baby  
Know where you've been taking me  
And put on the tab, that thing will be your misery

Swallow me like poison  
Back down, turn around, double down, breaking me  
Run down, ghost town,  
Pain will meet your misery  
Doctor's orders, fist pulling chains  
Run top, evil shock, middle the air  
Live wire, hot fire, get some flare  
Open up wide, take your bitter pill  
Open up wide and swallow

Let the pieces fall where the bodies lay  
Where the trees will reach, come on  
How it goes, how it goes does everybody get a taste?  
For all the touch, the ending is an awful waste

Swallow me like poison  
Back down, turn around, double down, breaking me  
Run down, ghost town, pain will meet your misery  
Doctor's orders, fist pulling chains  
Doctor's orders, we're the pain

I know where the cold wind blows and the hot set on fire  
Take down the coldest snow where July just walk away  
No I'm not a liar,  
Walk away  
No I'm not a liar, caging a goddamn way
