

Pet Shop Boys, E mail

Communications never been
as easy as today
And it would make me happy
when you'd gone so far away
you'd send me an email that says "I love you"
send me an email that says "I love you"
Now time and distance melt away
no digital delay
and some things can be written down
but we're too shy to say
"Send me an email that says 'I love you'"
"Send me an email that says 'I love you'"
There may be other temptations in your life
Don't want to add more complications to your life
By sending this email to say "I love you"
By sending this email to say "I love you"
Now there's a ghost within this house
you're haunting me tonight
I'm looking at some photographs
and thinking that I might
jump on a plane and surprise you where
you are. Do you want me there?
I'm so insecure
but one thing would make me sure
If you send me an email, it says "I love you"
send me an email it says "I love you"
send me an email it says "I love you"
