Phoenix, Sometimes In The Fall

Go out and tell the society
The talk of the town is on its way
This is not bad only serious

Do understand, don't turn your back on me Doesn't matter heads or tails People know my sins, I'm

Sometimes in the fall, fall, fall, fall

There'll be nothing to keep you far from me Before I am long long gone There'll be nothing to

Every night at seven o'clock Every day at six in the morning too

People calling me up here

Didn't even take some time to look at them I'm long gone If you're walking around then I'll go out to

Sometimes in the fall, fall, fall, fall

There'll be nothing to keep you far from me Before I am long long gone There'll be nothing to

And it goes on and on and on, it's everlasting It's always the same when you're next to me Sometir

Long gone
Many eyes to see for me
Only yours to cry on my ashes
Long gone

It's the darkest night and I'm far from you Youve been awake all night He's a Nobel Prize I said Too

Sometimes in the fall, fall, fall, fall

There'll be nothing to keep you far from me Before I am long long gone There'll be nothing to I

And it goes on and on and on, it's everlasting It's always the same when you're next to me Sometir
