

Plain White T's, You Plus Me

It's so elementary
Minus you I'm incomplete
We're the perfect problem, baby
You plus me
Hold your breath and count to three
Dancing with our four left feet
We're the perfect problem, baby
It's just you plus me

No point in trying to fight it
I like you and I can't hide it
I can feel the chemistry
Like it was meant to be
Scream out, I can't keep quiet
You and me can start a riot
They'll chase us down the street
We'll cause the biggest scene

'Cause our love's something that you can't divide
(Can't divide it)
I'd choose you a hundred million times
(Multiply it)

It's so elementary
Minus you I'm incomplete
We're the perfect problem, baby
You plus me
Hold your breath and count to three
Dancing with our four left feet
We're the perfect problem, baby
It's just you plus me

It's just you plus me
It's just you plus me

Our love's something that you can't divide
(Can't divide it)
I'd choose you a hundred million times
(Multiply it)

So let's lay it all out on the table
I'll be with you every second that I'm able
You could be the queen, I could be the king
They're gonna write about us like a fable
I just want you by my side on the daily
Write you songs, play 'em on my ukulele
Following my lead, hit the harmonies
We'll be singing to each other till we're eighty

It's so elementary
Minus you I'm incomplete
We're the perfect problem, baby
You plus me
Hold your breath and count to three
Dancing with our four left feet
We're the perfect problem, baby
It's just you plus me

It's just you plus me
It's just you plus me
