

Queen, Keep Passing The Open Windows (12" E

Words and music by Freddie Mercury

This is the only life for me
Surround myself around my own fantasy
You just gotta be strong and believe in yourself
Forget all the sadness 'cause love is all you need
Love is all you need

Do you know what it's like to be alone in this world
When you're down and out on your luck and you're a failure?
Wake up screaming in the middle of the night
You think it's all been a waste of time
It's been a bad year
You start believing ev'rything's gonna be alright
Next minute you're down and you're flat on your back
A brand new day is beginning
Get that sunny feeling and you're on your way

Just believe - just keep passing the open windows
Just believe - just keep passing the open windows

Do you know how it feels when you don't have a friend
Without a job and no money to spend?
You're a stranger
All you think about is suicide
One of these days you're gonna lose the fight
You'd better keep out of danger - yeah!
That same old feeling just keeps burning deep inside
Keep telling yourself it's gonna be the end
Oh get yourself together
Things are looking better everyday

Just believe - just keep passing the open windows
Just believe - just keep passing the open windows

This is the only life for me
Surround myself around my own fantasy
You just gotta be strong and believe in yourself
Forget all the sadness 'cause love is all you need
Love is all you need

Just believe - just keep passing the open windows
Just believe - just keep passing the open windows

You just gotta be strong and believe in yourself
Forget all the sadness 'cause love is all you need - yeah
Love is all you need
Baby - love is all you need

Just believe - just keep passing the open windows
Just believe - just keep passing the open windows
Just keep passing the open windows...
