

Ringo Starr, What In The World

(Starkey/Hudson/Grakal/Dudas)

I remember it all

That magical moment I'll never forget

We started to fall

Higher and higher in love than I thought I could get

It was so hard to find someone

And then I found you

(Chorus)

What in the world would I do

Living in a world without you

Me and the sky would be blue

Bluer than I ever knew

The sun will shine but there'll be no light

And nothing to look forward to

In a world without you

Just you and I

Passionate lovers forever this time

Our hearts couldn't lie

Never say never whenever you don't want to try

Sometimes it's hard but we'll get through

We always have we always do

(to Chorus)

Being in love letting our feelings show

Let me tell you again what you already know

(to Chorus)
