

# Riverside, Second Life Syndrome

[Part One From hand to mouth]

From day to day  
From hand to mouth  
We're turning around  
Vicious ritual

Getting used to it all  
Falling down again  
We're waiting for  
The decrees of providence

I don't want to waste  
Any more of my life  
Live from day to day  
Live from hand to mouth

Facing the light  
I brush aside your plans  
I'm going to have  
It all my own way

And when that all shattered I felt I'd broken my fall  
Couldn't pretend that I felt strong about us anymore  
Without your help I finally started to live my own life  
I just want you to know this time

[Part Two Secret Exhibition]

I just want to feel your sigh on my neck  
Want to feel your breath  
Feel your need to stay  
You don't know my name  
Don't know my face  
Only thoughts I share in my secret place

Secret exhibition  
Cure for loneliness  
I've ground to a halt  
There's no turning back  
You know there are things I just can't forget  
You've helped me so much  
To learn to be detached

But when that all shattered I felt I'd broken my fall  
Couldn't pretend that I felt strong about us anymore  
Without that help I finally started to live my own life  
And I know I don't need you now

Secret exhibition  
Cure for loneliness  
Life is much too short to be whiled away with tears  
Secret exhibition  
Cure for loneliness  
I erase you now  
I don't need you now  
I erase you now with all of my past
