Runga Bic, All Fall Down

Daylight, let it stir you Let it kiss the sleep out from your eyes Feel this weight now, lift into the sky On and on and on On and on and on Cradle, so deeply So sleepy when I close my eyes Sprinkle morning all over you and I On and on and on On and on and on CHORUS: Sleep tonight Drains into the morning Let it feel alright It beckons like a warning Trace it, embrace it See it crashing through this pretty light And yes you know me and how this thing of ours goes On and on and on On and on and on **CHORUS** And when we touch the ground We all fall down
