

S Club, Good Times

Paul:

You're working too hard
Too many hours on the job
And you know it must get better than this
You're killing yourself
And missing your love
It's been weeks since you've been with your friends

We all need to change once in a while
The time to make a change is right now...

Chorus:

This is for the good times, good times
This is for the good life
This is for the good times, good times
This is for the good life
Take it easy baby, here's to good times

Paul:

The pressure's on
Boss is breathin' down your neck
But the only thing you see's that vacation pamphlet on your desk
You fantasise
The day you leave it all behind
To spend the best days of your life just lying in the sun

We all got to change once in a while
The time to make a change is right now...

Chorus:

This is for the good times, good times
This is for the good life
This is for the good times, good times
This is for the good life
Take it easy baby, here's to good times

Paul:

It's for the good times baby

We all need a change once in a while
The time to make a change is right now

Chorus:

This is for the good times, good times
This is for the good life
This is for the good times, good times
This is for the good life
Make it easy baby, here's to good times
(fade out)
