

# Sergio Mendes, Pretty World

Why don't we take a little piece of summer sky  
Hang it on a tree  
For that's the way to start to make a pretty world  
For you and for me

And for the sun we'll take a lemon bright balloon  
You can hold the string  
Oh can't you see that little world of ours will be  
The prettiest thing

We can gather rain enough for the stream  
To hold our happy faces  
When we want a breeze, I'll blow you a kiss or two  
Take me in your arms and our little world  
Will be the place of places  
Nothing left to make but breakfast and love

We'll hang a little sign that just says Paradise  
Population two  
For that's the way to start to make a pretty world  
For me and for you  
For you  
It's what I wanted to do, to do  
To make a world.....for you
