

# Shawn Mendes, Fallin' All In You

Sunrise with you on my chest  
No blinds in the place where I live  
Daybreak open your eyes  
'Cause this was only ever meant to be for one night  
Still, we're changing our minds here  
Be yours, be my dear  
So close with you on my lips  
Touch noses, feeling your breath  
Push your heart and pull away, yeah  
Be my summer in a winter day love  
I can't see one thing wrong  
Between the both of us  
Be mine, be mine, yeah  
Anytime, anytime

Ooh you know I've been alone for quite a while, haven't I  
I thought I knew it all  
Found love but I was wrong  
More times than enough  
But since you came along  
I'm thinking baby

You are bringing out a different kind of me  
There's no safety net that's underneath, I'm free  
Falling all in  
You fell for men who weren't how they appear  
Trapped up on a tightrope now we're here, we're free  
Falling all in you

Fast forward a couple years, yeah  
Grown up in the place that we live  
Make love, then we fight  
Laugh 'cause it was only meant to be for one night baby  
I guess we can't control  
What's just not up to us  
Be mine, be mine, yeah  
Anytime, anytime

Ooh you know I've been alone for quite a while, haven't I  
I thought I knew it all  
Found love but I was wrong  
More times than enough  
But since you came along  
I'm thinking baby

You are bringing out a different kind of me  
There's no safety net that's underneath, I'm free  
Falling all in  
You fell for men who weren't how they appear  
Trapped up on a tightrope now we're here, we're free  
Falling all in you

Every time I see you baby I get lost  
If I'm dreaming, baby, please don't wake me up  
Every night I'm with you I fall more in love  
Now I'm laying by your side  
Everything feels right since you came along  
I'm thinking baby

You are bringing out a different kind of me  
There's no safety net that's underneath, I'm free  
Falling all in  
You fell for men who weren't how they appear  
Trapped up on a tightrope now we're here, we're free

Falling all in
