Shawn Mendes, Three Empty Words

I'll pick you up at the same time
The same place
The same old drive
We'll just talk about our day
To try to fill the awkward space tonight

We'll play the songs we used to love
While we try to fall in love again
We don't know who's wrong or right
And we don't even care enough to fight

We're going through the motions
'Cause we can't fix what's broken
And I know it's gonna hurt
But darling I'll go first
'Cause I won't keep on saying
Those three empty words
And I won't keep on saying
Those three empty words

We're still talking everyday
I'm running out of things to say to ya
What's really gonna break my heart
Is to have to tell your little brother
It might be easier to stay
But it will never be the same no
And if something doesn't change
Then we'll keep on sinking further

We're going through the motions
'Cause we can't fix what's broken
And I know it's gonna hurt
But darling i'll go first
'Cause I won't keep on saying
Those three empty words
I won't keep on saying
Those three empty words

Those three empty words will only make it worse
I'm tired I can't take it anymore
Those three empty words will only make it worse
We're tired we can't take it anymore
We're going through the the motions
'cos we can't fix what's broken

And I know it's gonna hurt
But darling I'll go first
I won't keep on saying
Those three empty words
We don't have to keeping on saying
Those three empty words
I can't keep on saying
Those three empty words
