

Sigma, Stay

Possible we break apart
Always been this way from the start

This energy is like crashing stars
Blame it on our magnetic hearts

Gimme all of your love
I need all your love
Gimme all of your love
Stay for me, baby
Gimme all of your love
I need all your love
Gimme all of your love

Gimme all of your love
I need all your love
Gimme all of your love
Stay for me, baby
Gimme all of your love
I need all your love
Gimme all of your love

All your love
All your love
All your love

Never felt this way, like I'm falling apart
Something hard to explain
It's been there from the start
There's a chemistry, like an burning star
When we close I can't help it, babe, magnetic hearts
