

Skrewdriver, From The Land

I stand and watch my country today
It's so easy to see that it's being taken away
All the immigrants and all the left wing lies
Why does no one ever ask the reason why

(Chorus)

We were the country that had everything
We were the country, Rule Britannia we would sing
We were the country, and we could never lose,
Once a nation, and now we're run by Jews
We want our country back now!

It's time our people stood together side by side
It's time we stood and fought against the media's lies
The capitalists and the communists, well they co-exist
If you love your country, you'll be on their list.

The sands of time are running out for this land
It's time the people stood and raised their hands
It's time we drove out the traitors that we can see
Now is the time this nation should be free, free my land
