

Smash Mouth, New Planet

We need a new planet
You were a rock but I took you for granite
Ain't that a shame, ain't it a sin
We had too much baggage when our ship came in
Like a lazer beam
You're never what I'm seeing
I ought to better my best behaviour
I can't deny, I lit the fire
But the twist of fate bridge was gonna burn anyway

CHORUS: Without you it's no fun
It's like a total eclipse of the sun
Without you it's no wonder
It's like a total eclipse of the sun
It's just the time of the season
I'm getting tongue tied facing my deamons
But I'm free cause I want you to be
But the twist of fate bridge is gonna burn anyway

We need a new planet
You were a peach but I told you to can it
You weren't the only pig in the pen
We had too much baggage when our ship came in

CHORUS
