

Snowman, Arrivederci Everyone

love making calibrated
home making mutilated
than taking integrated

get rid I gotta get a grip and
get rid of all the things that
made it of all the years of
fake guilt of sobering and complaining
adjusting and returning
our fire that kept burning

all doubts and hesitations
the months of devastating
avoiding and invading
no explanations landing
two souls caught in the making /3x

love making calibrated
home making mutilated
pain taking integrated

into that fairy tale of us
into that very tale of us
into that scary take of us
set up and framed in love /3x

doubted but firm
I hold onto handles
rise unafraid
free like a ...

and never by day we will rest from the sorrow
and never by night from the hand of the spoiler

whenever I looked for compromise, there was no perfect time to hear
what's on your mind

and never by day we will rest from the sorrow
and never by night from the hand of the spoiler

arrivederci everyone
I never thought I would be gone
Never thought it would begin
but now I'm better in than out

arrivederci all my fears
I'm leaving now, I'm leaving you here
I'm looking straight at the sun
looking straight forward

arrivederci everyone
I never thought I would be gone
Never thought it would begin
but now I'm better in than out
/4x
