

Somersault, Symphony

Sometimes I wanna write you a symphony
For you and me - endlessly
But none of the notes have the frequency
To carry the vibes for real

Sometimes I know you are the one
Burning with me - endlessly
Side by Side - everyone on their own
Like a newborn we are nothing alone

Over and over I see
This is bigger than me

Refrain:
Baby, come on come on
You are the one
To bring me home
Cause no one is born
To be alone
In a winter storm

One day we have to leave the scenery
Finally - in eternity
Im sure you will find me in the galaxy
Holding the time just in your hands

And then I will write you a symphony
For you and me - endlessly
And all of my notes have the frequency
Reaching the end - the end of the world
