

Stornoway, The Road You Didn't Take

Sleeping on a mountain
For a night to shiver under skies
But play cool as the cats' eyes
On the road you didn't take
On the road you didn't take
On the road, on the road
On the road you didn't take,
The road you didn't take

Get high up on the mountain
Feel your lungs start burning as you rise
Sometimes when you get to this height
You will see another hill to climb
But sometimes all you can see
When you look down the other side
It's the road you didn't take
The road you didn't take
It's the road you didn't take
The road you didn't take

So move about to somewhere
That the ways are brown at the sound
On the road you didn't take
On the road, on the road you didn't take
On the road you didn't take
The road you didn't take
On the road you didn't take
The road you didn't take
