Super Furry Animals, Down A Different River

Stuffed to the eyeballs with God knows what You're a conversational hazard Talking so quickly with so much ease I think you might have just snorted a blizzard Oh! Won't you tell it to someone else?

And we'll go down a different river
And we'll see where it carries us
Meet me at the muster station
And if the ship's going down we'll swim for the ground
Come on, come and join us here

Living a lie when I'm lying here I've got windswept eyes in the morning Doesn't improve as the day goes on You got a shagpile perm in the evening! If I could only make out the door

And we'll go down a different river And we'll see where it carries us Meet me at the muster station And if the ship's going down we'll swim for the ground Come on, come and join us here, here, here

If I could only make out the door! (Slowly down a different river) If I could only make out the door! (Slowly down a different river) If I could only make out the door! (Slowly down a different river) If I could only make out the door! (Slowly down a different river) If I could only make out the door! (Slowly down a different river) (Slowly down a different river) (Slowly down)
