

Take That, How Did It Come To This

I didn't see it coming
It took me by surprise
Just when I wasn't looking
I noticed all the lies

And how did it come to this?
You stabbed me in the back
How did it come to this?
You said you were my friend

You had your own agenda
But someone starves at home
I'm sorry I cannot help, but
The one that starves is the one I love

And how did it come to this?
You stabbed me in the back
How did it come to this?
Alone with nothing left
How did it come to this?
You said you were my friend
How did it come to this?
After everything I did

And how did it come to this?
You stabbed me in the back
How did it come to this?
Alone with nothing left
How did it come to this?
You said you were my friend
How did it come to this?
After everything I did

For you
You said you were my friend
How did it come to this?
