

Taxiride, Afraid To Fly

Feel like you're losing your innocence
Taking this all on again
A friend said it's easy
But you know this feeling
That keeps you by the window
Something to weight that heavy heart

Don't be afraid to be
Feeling so bad you see
It won't be long till you get back home
Dream what you wanna be
Feel it so easily
Don't be afraid to fly just let go
With the sunlight in your eyes

Climbing that cloudy maze all night
Separate this world in disguise
Surfacing the moon-struck horizon
You're already drifting through tomorrow
Turning the black holes into stars

Don't be afraid to be
Feeling so bad you see
It won't be long till you get back home
Dream what you wanna be
Feel it so easily
Don't be afraid to fly just let go
With the sunlight in your eyes

And when you get that high
Never say goodbye
To sunlight moving slowly through your window
And on your face
And when you get so high
You're gonna find
It doesn't get much better
Now it's all that you need to fly

Don't be afraid to be
Feeling so bad you see
It won't be long till you get back home
Dream what you wanna be
Feel it so easily
Don't be afraid to fly just let go

You're on your way to be
Catching that star you see
So don't be afraid to fly, just let go
With the sunlight in your eyes.
